

# Dermatology Crossword

**Across**

- 1 The largest organ of the body
- 3 An area of the skin that has changes in texture or color and may look inflamed or irritated
- 4 Pigment that gives skin its color
- 5 The invasion and growth of germs in the body. The germs may be bacteria, viruses, yeast, fungi, or other microorganisms
- 6 Outermost layer of the skin
- 8 A benign, non-cancerous growth on the skin that is also known as a nevus
- 9 Dermatology covers skin, nails and \_\_\_\_\_
- 11 A condition that causes your skin to become dry, itchy and bumpy. Also known as atopic dermatitis

**Down**

- 1 Apply every 2 hours when going outside
- 2 A result of old age
- 7 Synonym for scratch
- 8 Most dangerous form of skin cancer
- 10 Condition that occurs when the hair follicles get clogged with oil, skin cells, and bacteria. Symptoms include blackheads, whiteheads, pimples, and painful nodules under the skin
- 12 Applied to the skin as a topical treatment. Can help with dry skin, rashes, or skin lesions because their oil content helps protect against moisture loss
